(54) RADIO SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To surely switch a reception system of a vehicle that moves between areas of different systems in the case of modifying part of the radio systems.

SOLUTION: A switching signal oscillator 3 that outputs a switching signal is placed in a common area A3, and a plurality of forced switching signal oscillators 4, 5 that send a forced switching signal used to forcibly switch the radio system of a vehicle 1 to the radio system of a communication area A1 or A2 are placed in the communication areas A1, A2 adjacent to the common area A3 respectively. Thus, the radio system of the vehicle 1 is switched to that of each of the communication areas A1, A2.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
